

get CME from AJP

Brief companion exams are created for three of the most influential articles from each issue. By reading the articles and completing the online exams, you can test your knowledge and earn up to 1 *AMA PRA Category 1 Credit*[™] per article. Correct answers are highlighted for your reference upon completion of the course; there is no minimum threshold score necessary for the credit. A link from the question to the correct answer in context will also be highlighted in the associated article, thus extending the learning experience.

CME credit is only provided online, and a subscription to the AJP CME program is required. From the moment you subscribe to the AJP CME program, you will be able to select from 72 courses from among 40 possible subject areas. You'll also be able to access the next 33 courses as they become available. For more information and pricing, please go to <http://cme.psychiatryonline.org/misc/aboutajpcme.shtml>

This activity is sponsored by the American Psychiatric Association. The American Psychiatric Association is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The American Psychiatric Association designates each educational activity for a maximum of 1 *AMA PRA Category 1 Credit*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Fulfill your CME requirement while staying current on the latest advances in psychiatry.

Peter Fielden 1915–2008

(2008–2009). William Fielden (b. 1942).

William describes this work as follows: 'The last 2 years of Peter Fielden's life were housebound. Weekly I did his shopping and took him out. As his infirmity grew, so we sat about together more; not congenial for either of us. To mitigate the time lost from my work as a painter I began this series of paintings, all the same size, and continued weekly for about 18 months up to his death.

A previous series of paintings featured a favourite tree, also done weekly for a year. There was no plan for the Dad paintings except to keep me busy while sitting about hoping for fresh scraps of family history. At his death there were over 70 paintings, so as a companion piece to the tree I counted back 52 weeks from Father's death and mounted the paintings in a reliquary. The final phases of Father's 93-year life were grim and the act of painting made his predicament more palpable but concentration kept sentiment in check and maybe eased the final goodbye.'

We are always looking for interesting and visually appealing images for the cover of the *Journal* and would welcome suggestions or pictures, which should be sent to Dr Allan Beveridge, British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG, UK or bjp@rcpsych.ac.uk.
