

The American Psychiatric Association Publishing Textbook of Forensic Psychiatry, Third Edition

Edited by Liza H. Gold, M.D., and Richard L. Frierson, M.D.

JUST PUBLISHED!

The new, third edition of *The American Psychiatric Association Publishing Textbook of Forensic Psychiatry*, now under the insightful leadership of Drs. Gold and Frierson, has undergone a major expansion and a comprehensive revision that reestablish it as the preeminent text in the field. No fewer than 10 new chapters have been added, and the entire book has been restructured to reflect the American Board of Psychiatry and Neurology's Content Outline for the Certification Examination in Forensic Psychiatry, thus facilitating its use in preparing for certification or maintaining certification.

In addition, the book constitutes a useful reference for general psychiatrists and psychologists interested in the legal issues that may impact clinical practice. The emphasis on Landmark Cases—as

fascinating as they are illuminating of critically important topics in case law—is highlighted in this edition, fostering understanding of the evolution of legal principles on the general practice of psychiatry and in the subspecialty of forensic psychiatry.

Written by some of the foremost experts in the field and structured for optimal utility, *The American Psychiatric Association Publishing Textbook of Forensic Psychiatry* will play an indispensable role both in educating forensic psychiatry fellows and general psychiatry residents and in keeping experienced clinicians up-to-date.

American Psychiatric Association Publishing Textbook of Psychopharmacology, Fifth Edition

Edited by Alan F. Schatzberg, M.D., and
Charles B. Nemeroff, M.D., Ph.D.

The *American Psychiatric Association Publishing Textbook of Psychopharmacology* is an indispensable and comprehensive resource for clinicians and trainees who prescribe psychotropic medications. Updated to reflect the new DSM-5 classification, this revised Fifth Edition maintains the user-friendly structure of its predecessors while offering in-depth coverage of the latest research in pharmacological principles, classes of drugs, and psychiatric disorders.

Introductory chapters provide a theoretical grounding in clinical applications, with topics ranging from neurotransmitters to brain imaging in psychopharmacology. The bulk of the book is devoted to various classes of drugs with each class divided into chapters on specific drugs—either new or revised to include the latest findings and trends. Finally, the section on psychopharmacological treatment addresses evidence-based principles of clinical care for the full spectrum of mental disorders and conditions—from depression to chronic pain—as well as for specific populations and circumstances—offering information on topics such as medication selection, combination and maintenance dosing regimens, monitoring and management of side effects, and strategies for optimizing treatment response.

The *American Psychiatric Association Publishing Textbook of Psychopharmacology* provides state-of-the-art information on both the principles and the practice of psychopharmacological treatment of psychiatric disorders.

Outpatient Adult Psychiatrists

Minnesota

Share your expertise in an environment that supports new treatments and innovation while embracing a strong work-life balance.

HealthPartners is a dynamic multi-specialty medical group practice headquartered in the Twin Cities of Minneapolis/St. Paul, Minnesota. Our Behavioral Health group has a large outpatient practice with 21 adult psychiatrists, 4 child psychiatrists, 7 clinical nurse specialists and 60 therapists. Each has special interests and expertise, but also practice as generalists to provide outstanding clinical care to our diverse patient population via **integrated outpatient services** with our primary care and specialty clinics.

We have exciting practice opportunities for outpatient adult psychiatrists, and provide:

- Full-time and part-time practices
- Competitive pay
- A generous benefits package, including relocation assistance, employer-matched 401(k) and 457(b), malpractice coverage, and competitive PTO and CME
- Minimal call requirements (by pager/phone) covering outpatient practice
- Affiliation with multiple hospitals and clinics including inpatient psychiatry, intensive day programs, chemical dependency programs, and eating disorder programs
- A large internal referral base
- Exceptional nursing support and psychotherapy colleagues
- An organizational commitment to a sustainable medical practice with EHR, documentation efficiency work group, extensive billing and coding support, integrated services and telemedicine

HealthPartners' integrated health care system is recognized locally and nationally for great care and leadership. We believe outstanding health care is delivered when we merge the science of medicine with the compassion, spirit and humanity of our hearts. We refer to this as "**Head + Heart, Together,**" which exists to inspire constant improvement and lasting success. We achieve this by partnering with patients and families in everything from care decisions to service and facility design. As we work together as a unified team, we engage patients, families and the community, and put them at the center of everything we do.

ACUTE Center for Eating Disorders Denver Health

The ACUTE Center for Eating Disorders at Denver Health in Denver, Colorado, the nation's original and premier medical stabilization unit for those eating disordered patients suffering from the most extreme forms of the disease, is for the first time ever recruiting a **full-time psychiatrist** to work on this unit. ACUTE has just moved into a brand new 30 bed ICU-type unit due the ongoing increasing demands for this unique service. The person selected for this new position will be a member of the medical staff at Denver Health with an academic appointment at the University of Colorado School of Medicine commiserate with skills and academic experience.

In addition there is a tremendous opportunity for funded and investigator research with this extremely ill patient population. Successful candidate would be working on a multidisciplinary team, including Dr. Philip S. Mehler, Founder of ACUTE, and Dr. Margherita Mascolo, Medical Director of ACUTE.

Psychiatric Research and Clinical Practice

Edited by Kimberly A. Yonkers, M.D.

An Open-Access Journal From the American Psychiatric Association

Psychiatric Research and Clinical Practice (PRCP) is a new peer-reviewed, open-access journal from the American Psychiatric Association that offers a high-profile publishing destination for peer-reviewed submissions that build upon the psychiatric knowledge base and bring research findings closer to clinical utility through deeper investigation.

Submissions on all aspects of mental and behavioral health to inform the field from bench to bedside are welcome. PRCP seeks to occupy that place between research and clinical utility, leaning toward clinical utility through publication of replication studies and features that show how new scientific knowledge can inform clinical practice. The journal will also feature “Clinical Pearls”—accounts by clinicians using the findings from the most up-to-date clinical research to help solve problems commonly confronted in clinical practice.

PRCP maintains the rigorous standards of APA's scholarly publications while providing an essential resource for today's practicing physicians. Published in accordance with open-access principles, PRCP makes all of its content immediately available for free—the reach one wants from an established and respected publisher.

Psychiatric Research and Clinical Practice is committed to keeping the field of psychiatry vibrant and relevant by publishing wide-ranging information on all aspects of mental and behavioral health and enhancing APA's leadership role in scientific publishing in psychiatry by expanding the amount of research, clinical practice, and systems of care content available to the field.

About the Editor

Kimberly A. Yonkers, M.D., is Professor of Psychiatry, Epidemiology, Obstetrics/Gynecology, and Reproductive Sciences and Director of the Center for Wellbeing of Women and Mothers at Yale University. She brings to the task of serving as PRCP's Editor a broad and deep experience in research and clinical work. Her research includes investigations into the clinical course, etiopathology, and treatment of psychiatric disorders as they occur in women. A major component of this work includes investigations into the occurrence and treatment of illnesses in pregnancy and the postpartum period and across the menstrual cycle. This area, by its nature, cuts across disciplines and requires psychiatric expertise as well as knowledge in neuroscience and reproductive biology. Her work has also included determining optimal methods for screening and treating women for substance use problems when they are pregnant or postpartum.

HERE is where NeuroStar[®] with Contact Sensing made a difference for Andy

FOR THE TREATMENT OF MAJOR DEPRESSIVE DISORDER (MDD)

Doctors who expect the same precision from other TMS systems are leaving treatment dosing to chance.

When contact with the head is off by just 1 mm, as much as a 40% loss in the prescribed TMS dose can occur.¹ **Only NeuroStar Advanced Therapy** with Contact Sensing precisely monitors treatment delivery in 3 dimensions and alerts the clinician if the coil loses contact, ensuring that the full dose is being administered.

When remission from MDD is at stake, precision matters. Trust the #1 TMS choice of doctors like you.

INDICATION

NeuroStar[®] is indicated for the treatment of Major Depressive Disorder in adult patients who have failed to receive satisfactory improvement from prior antidepressant medication in the current episode.

IMPORTANT INFORMATION

The most common side effect is pain or discomfort at or near the treatment site. These events are transient; they occur during the TMS treatment course

and do not occur for most patients after the first week of treatment. NeuroStar Advanced Therapy should not be used with patients who have non-removable conductive metal in or near the head.

NeuroStar Advanced Therapy is available by prescription only. Please visit NeuroStar.com for full safety and prescribing information.
