

Considering Going Deep with TMS for Your Practice? Here is Why You Should Choose MagVenture®

Are you a mental health professional who is considering TMS treatment options for your Practice? MagVenture provides proven solutions to treat major depressive disorder as well as OCD, solutions that help practitioners improve patients' lives and benefit their practice as well. You have choices when it comes to TMS systems. So why choose us?

Ease of Use.

Switch coils easily and quickly, with no tools.

Value.

No "pay-per-use" fees and low cost of operation. Start to recoup your investment immediately.

Specificity.

MagVenture systems exhibit a 6.4-fold lower seizure rate compared to systems with helmet-style coils.³

Flexibility.

The MV system is modular and grows with you. Our liquid-cooled coils allow you to treat patients back-to-back all day long.

Reputation and Efficacy.

More of our machines are installed globally than any other manufacturer. The foremost TMS experts and researchers use MagVenture systems.

Patient Satisfaction.

Our systems are quiet¹, comfortable², and less confining for the patient.

Support.

We have teams in three US locations to support you.

Find out what hundreds of practitioners already know about the benefits of working with MagVenture. Contact us today and let's talk about how we can help you get your patients well while providing value for your practice on day 1. **Go deep with MagVenture.**

The Louisville VA Medical Center is recruiting for a psychiatrist Section Chief, Acute Care Mental Health

The Louisville VAMC is recruiting for a Chief of Acute Mental Health. This Psychiatrist/Section Chief position provides leadership and oversight for the effective provision of acute mental health services in the inpatient and Emergency Department settings at this 1b level tertiary care VA health care system.

The incumbent serves as the psychiatry discipline lead for the facility Mental Health Service, and oversees the professional practice standards and privileges for mental health physicians. The incumbent will also maintain clinical privileges and provide direct patient care. The successful candidate will demonstrate strong experience in quality improvement, clinical operations, business acumen, academic affiliations, and supervisory regulations.

The RRVAMC is affiliated with the University of Louisville and applicants may apply for faculty appointment commensurate with their experience. A comprehensive rewards package commensurate with experience is offered with this position and may include Pay for Performance, Recruitment Incentives, Educational Debt Reduction Program and/or Ad Hoc Telework opportunities for eligible candidates - VHA Physician Total Rewards. Louisville, Kentucky

Interested Applicants:

Please apply and submit CV online at www.usajobs.gov

the Advancement of Psychiatry

Seeking Value: Balancing Cost and Quality in Psychiatric

Care, a comprehensive volume by the Group for the Advancement of Psychiatry's Mental Health Services Committee, examines the myriad factors that have led to the current state of health care in the United States—starting with an analysis of the meaning and history of value measurement—but it does not stop there. It offers a holistic vision for health care reform, one in which psychiatric professionals play a pivotal role.

Schizophrenia Imaging Signatures and Their Associations With Cognition, Psychopathology, and Genetics in the General Population

There is a pressing need for precise quantitative imaging phenotypes that assist in early detection of risk factors for psychosis. Multivariate machine learning methods in two large data sets demonstrated the neuroanatomical dimensional signatures of schizophrenia in population-based samples and showed their associations with psychosis symptoms, cognition, and genetic risk.

AJP Audio Podcast

The August 2022 episode of the AJP Audio podcast features Mark D. Shen, Ph.D., discussing "Subcortical Brain Development in Autism and Fragile X Syndrome: Evidence for Dynamic, Age- and Disorder-Specific Trajectories in Infancy" (p. 562).

AJP CME

Earn CME credit: 3 courses per issue

You can earn CME credits by reading articles in *The American Journal of Psychiatry*. Three articles in this issue form a short course that consists of reading the article and answering three multiple-choice questions with a single correct answer for up to 1 AMA PRA Category 1 Credit™ each. Credit is issued only to subscribers of the online AJP CME Course Program.

See the list below for articles in this month's issue that are the subject of a CME quiz.

In this issue

Evaluation of Antipsychotic Reduction Efforts in Patients With Dementia in Veterans Health Administration Nursing Homes (Gerlach et al., p. 544)

Subcortical Brain Development in Autism and Fragile X Syndrome: Evidence for Dynamic, Age- and Disorder-Specific Trajectories in Infancy (Shen et al., p. 562)

Infant Visual Brain Development and Inherited Genetic Liability in Autism (Girault et al., p. 573)
