FIGURE S1. PRISMA Flowchart of Study Selection

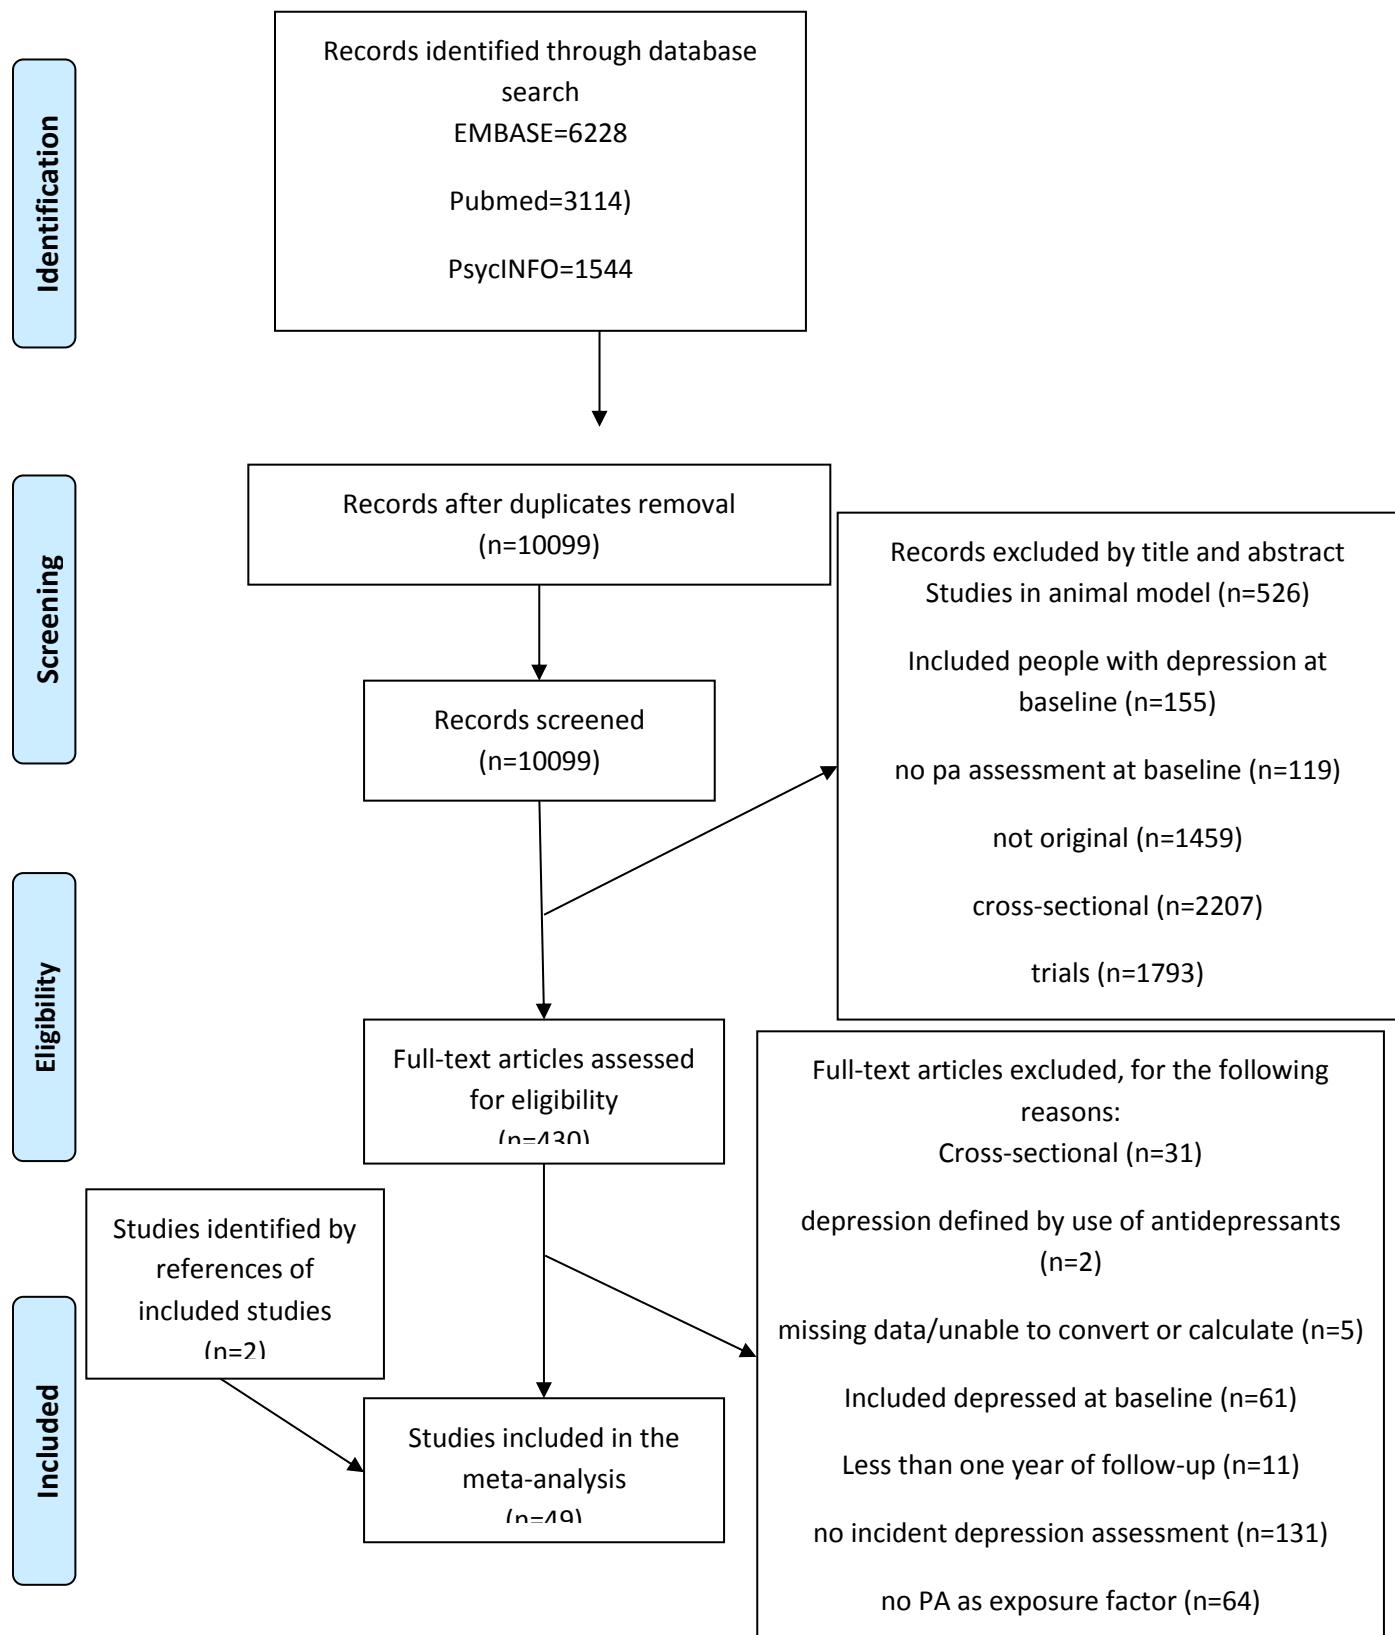

FIGURE S2. Forest Plot of Studies Examining the Association of PA and Incident Depression.

Effect size estimates are reported as crude odds ratios (ORs) and 95% confidence intervals (CI). Random-effects modeling was employed. Size of squares are proportional to sample size of individual studies, and diamond represents the summary effect size estimate.

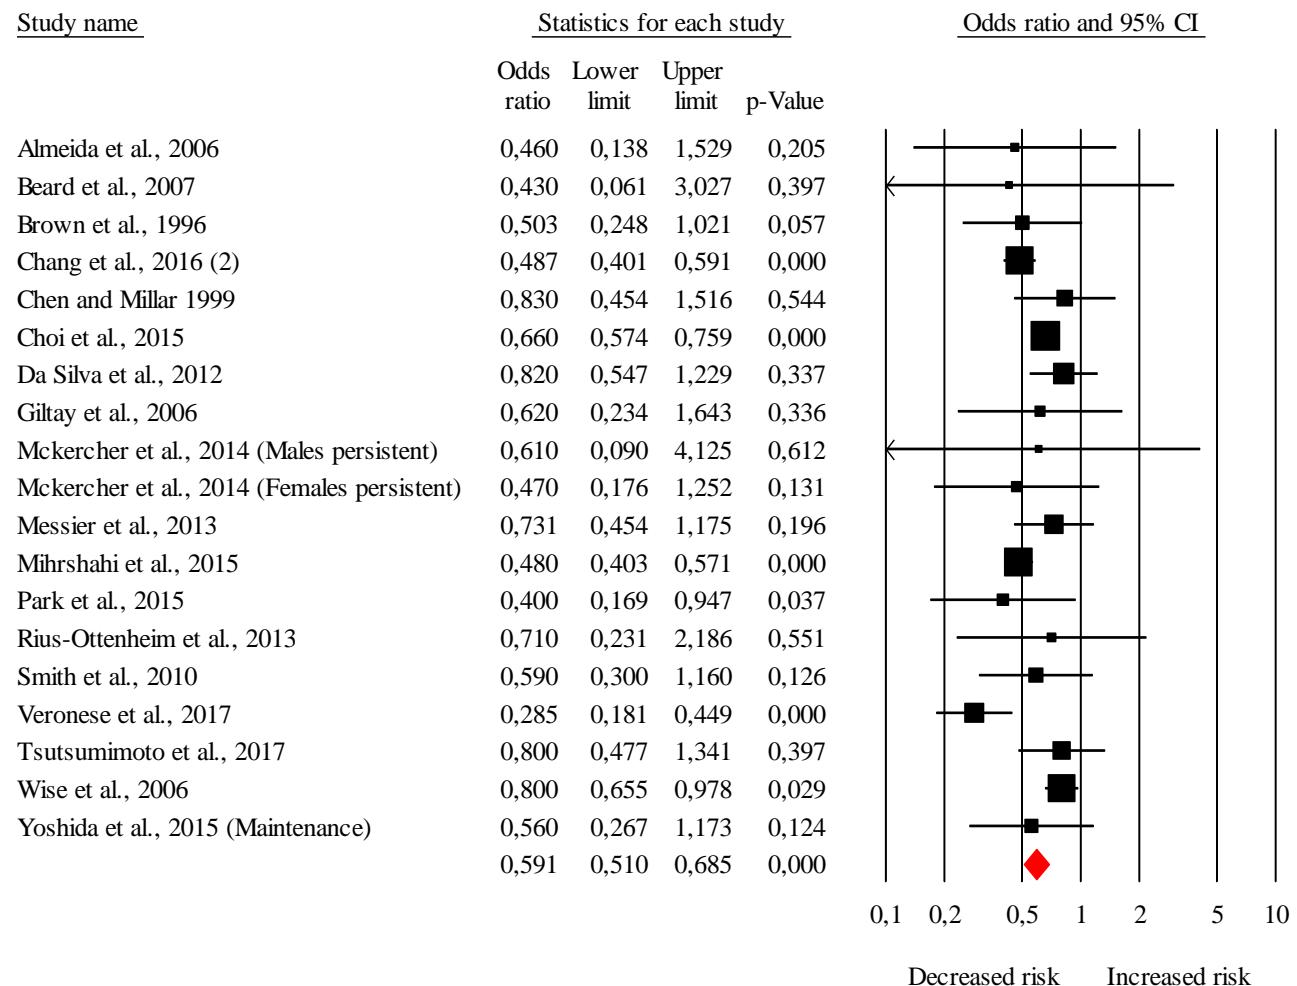

FIGURE S3. Forest Plot of Studies Examining the Association of PA and Incident Depression.

Effect size estimates are reported as adjusted relative risks (ARRs) and 95% confidence intervals (CI). Random-effects modeling was employed. Size of squares are proportional to sample size of individual studies, and diamond represents the summary effect size estimate.

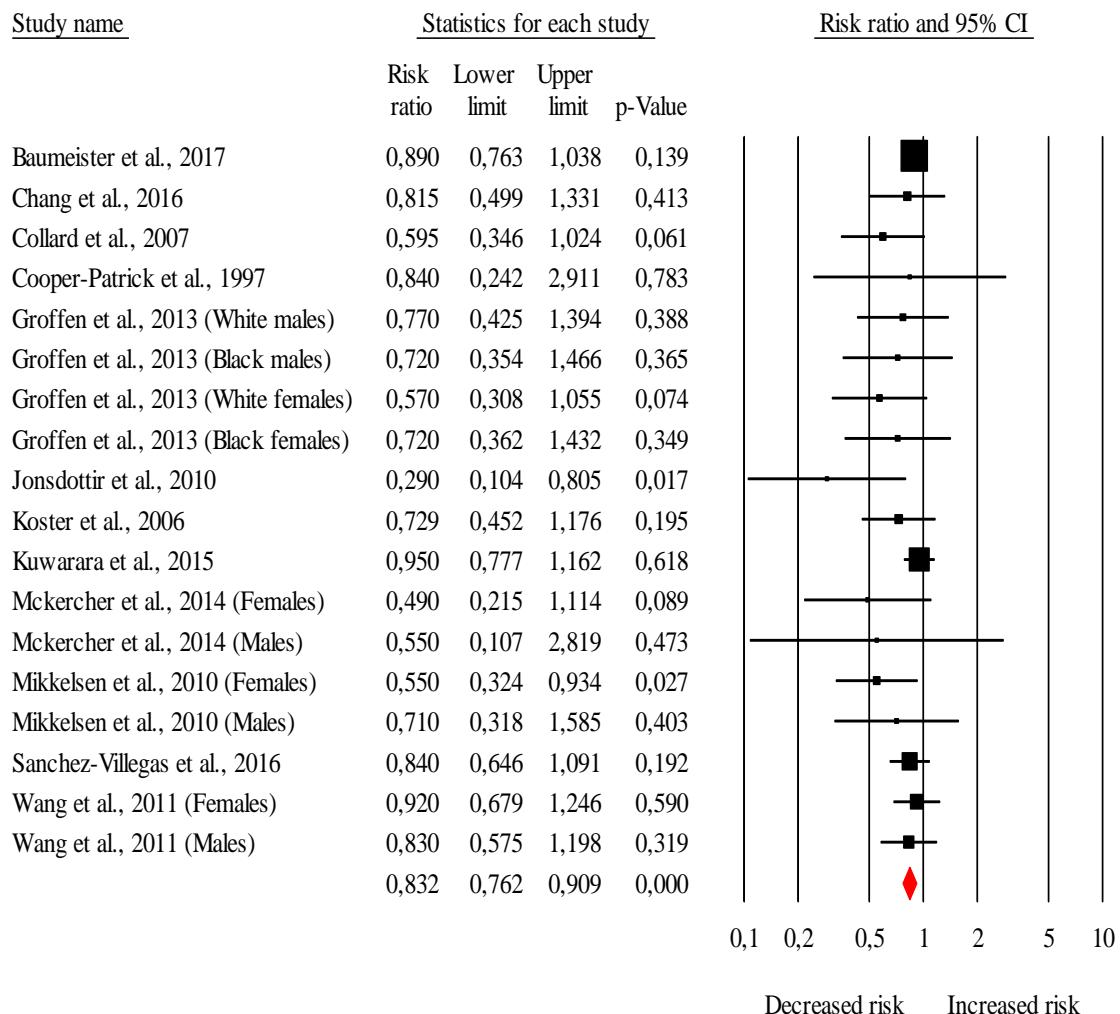

FIGURE S4. Forest Plot of Studies Examining the Association of PA and Incident Depression.

Effect size estimates are reported as crude relative risks (RRs) and 95% confidence intervals (CI). Random-effects modeling was employed. Size of squares are proportional to sample size of individual studies, and diamond represents the summary effect size estimate.

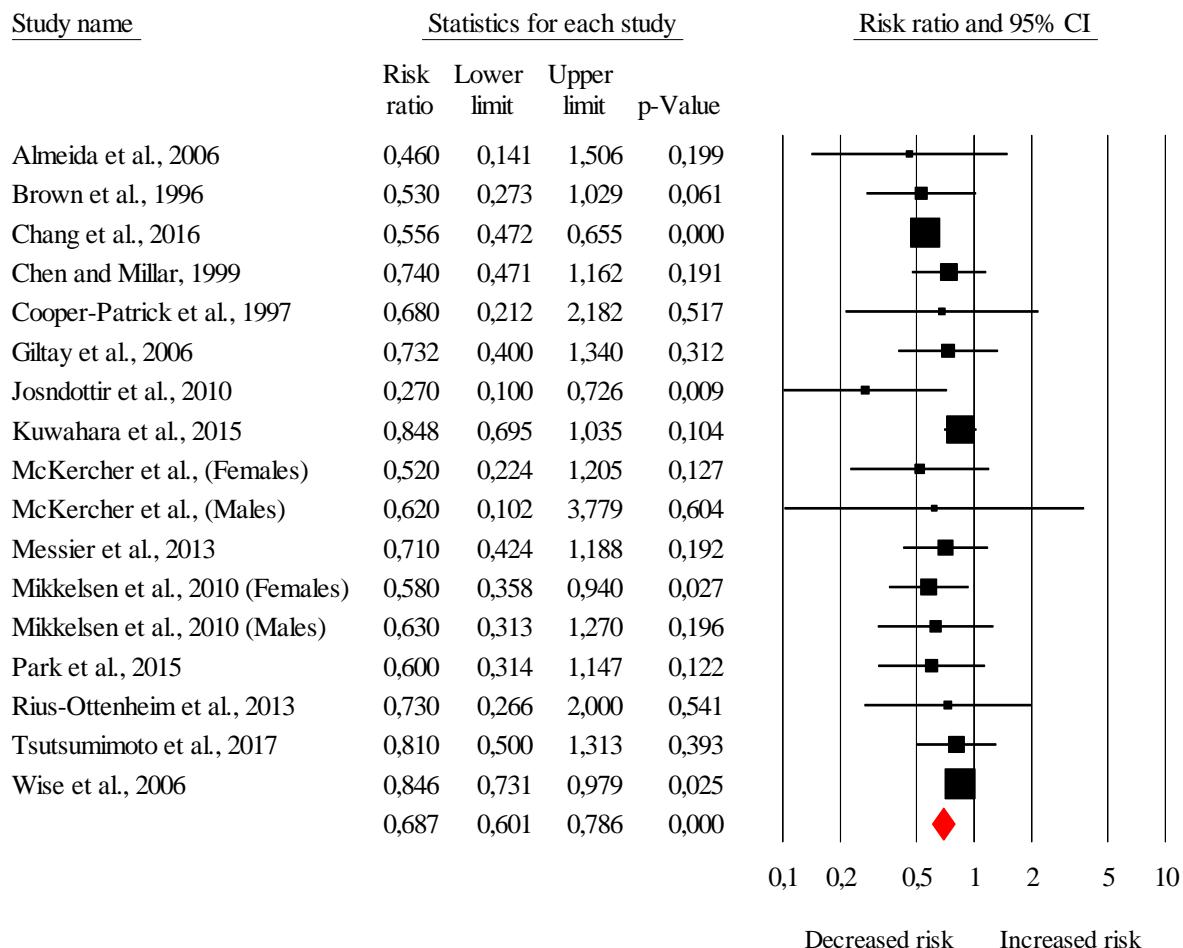

TABLE S1. Study Quality Assessment

Study/item	Rep. of the exposed cohort	Selection of the non exposed cohort	Ascertainment of exposure	Demonstration that outcome of interest was not present at start of study	Comparability of cohorts on the basis of the design or analysis	Assessment of outcome	Was follow-up long enough for outcomes to occur	Adequacy of follow up of cohorts	total

Key: The scoring of each item to the total of the study quality assessment is represented between each parenthesis. For the item "adequacy of follow up of cohorts", the criteria for scoring "C" (0) was a lost to follow up of 30% of the participants of the cohort.

TABLE S2. Covariates Used in Each Study

Study	Covariates
Almeida et al., 2006	none
Augestad et al., 2008	age, BMI, education, smoking, alcohol consumption and living arrangements
Baumeister et al., 2017	age, sex, years of schooling, alcohol consumption, smoking and waist circumference
Beard et al., 2007	none
Brown et al., 1996	none
Cabello et al., 2017	demographics, presence of a physical chronic condition, BMI, general health, status and country
Chang et al., 2016	age, sex, education, BMI, systolic blood pressure, current smoking, cholesterol, coronary event, never smoked, and self-reported stroke, antidepressant medication use, memory, executive function and cognitive function
Chang et al., 2016	none
Chen et al., 1999	age
Choi et al., 2014	age, sex, educational level, marital status, household income, religion, region, employment status, the number of chronic disease, regular exercise and year
Clark et al., 2007	age, gender, gender*age, ethnicity, eligibility for free school meals, general health status, long-standing illness, overweight, health-risk behaviours
Collard et al., 2015	age, gender, level of education, smoking status, alcohol use, number of somatic diseases, cognition
Cooper-Patrick et al., 1997	gender, age, smoking status, and substance abuse prior to depression.
Da Silva et al., 2012	sex, age, ethnicity, marital status, occupational position, stressful life events, satisfaction with work, alcohol intake, smoking status and self-reported respiratory disease
España-Romero et al., 2013	age, sex, baseline examination year, survey response year and alcohol consumption
Farmer et al., 1988	age, race, education, employment status, self-reported health, household income, and length of follow-up
Gallegos-Carrillo et al., 2012	age, sex, PA at baseline, education level, marital status, BMI, tobacco use, health problems in the last 6 months, number of chronic diseases, mobility problems, self-reported health status
Garcia-Pena et al., 2013	unclear
Giltay et al., 2006	none
Groffen et al., 2013	age, site, marital status, and prevalent disease
Hiles et al., 2015	unclear
Jerstad et al., 2010	baseline depression, body satisfaction, bulimic symptoms, social support, and previous year body mass index percentile
Jonsdottir et al., 2010	age, gender, body mass index, and educational level
Joshi et al., 2016	age, sex, race, income, and education
Koster et al., 2006	age and sex
Ku et al., 2008	age, gender, educational level, marital status, living status, satisfaction with social support, satisfaction with income, drinking alcohol, activities of daily living and number of chronic diseases

Kuwahara et al., 2015	age, sex, BMI, smoking, alcohol consumption, shift work, overtime work, job position, marital status, mutual relations and baseline depression scores
Messier et al., 2013	sex, age, education and marital status
McKercher et al., 2014	Age, self-reported health status, language spoken at home in childhood, number of live births, current occupation, and depressed mood
Mikkelsen et al., 2010	age, income, smoking, education, alcohol intake, BMI, occupational physical activity and chronic disease
Mehrshahi et al., 2015	education, marital status, BMI, physical activity, alcohol intake, fish and energy intake and comorbidities.
Mobily et al., 1996	age, marital status, smoking status at baseline, history of arthritis, hip fracture, stroke, cardiovascular disease, or emphysema at baseline and incidence of stroke, arthritis, cardiovascular disease, and emphysema between baseline and the 3-year follow-up
Park et al., 2015	age, sex, years of education, marital status, living arrangement, medical insurance, and employment
Pasco et al., 2011	Age, anthropometry, smoking, alcohol use and SES
Rius-Ottenheim et al., 2013	age, sex, education, marital status, smoking habits, alcohol use, diabetes mellitus, stroke, time since myocardial infarction, BMI, self-rated health, treatment group and cognition
Roh et al., 2015	age, gender, education, household income, smoking, alcohol intake, number of diseases, K-IADL score, cognition score and SGDS-K
Sanchez-Villegas et al., 2008	gender, age, employment status, body mass index, marital status, smoking, presence of any severe disease at baseline, alcohol intake and total energy intake
Sanchez-Villegas et al., 2016	age and sex, BMI, smoking, use of vitamin supplements, total energy intake, presence of cardiovascular disease, type 2 diabetes, hypertension, and dyslipidaemia at baseline, adherence to the Mediterranean diet, and socializing activities age, education, marital status, BMI, hypertension, diabetes mellitus, alcohol use, smoking status, prevalent coronary heart disease, stroke, cancer, Parkinson's disease, dementia, cognitive impairment, functional impairment, 8-year incident dementia or cognitive impairment
Smith et al., 2010	age and gender
Strohle et al., 2007	age, sex, ethnicity, education, financial problems, neighborhood, disability, chronic conditions, health behaviors, and the social relation variables
Strawbridge et al., 2001	gender, age, education, partner status, employment status, and presence of a somatic illness
Ten Have et al., 2011	sex, age, level of education, psychological stress, diabetes, heart disease, IADL status, family support, and audio acuity
Tsai et al., 2013	Age and sex
Tsutsumimoto et al., 2016	age, gender, educational level, marital status, smoking habits, activities of daily living score, number of diseases at baseline, Center for Epidemiologic Studies Depression Scale (CES-D) score, and immediate word recall, delayed word recall, orientation in time, verbal fluency and recall summary score at baseline and at follow-up
Veronese et al., 2017	age, BMI, marital status, working status, income, chronic diseases, social support, long-term disabilities or handicaps, restriction of activity, activity prevented due to pain, and self-rated health
Wang et al., 2011	sex, age, social class and physical disorder
Weyrer et al., 1992	age, education, occupation, marital status, geographic region, physical activity, BMI, preexisting health conditions, energy intake, smoking, current alcohol consumption, and child care responsibilities
Wise et al., 2006	sex, age, educational status, smoking status, alcohol consumption, outpatient visits, and higher-level competence
Yoshida et al., 2015
