

Variable Definitions, Relationship to Conceptual Model, and Hypothesized Relationships

<i>Analytic Use</i> Conceptual Framework Factor Variable	Type	Definition	Avg. Hours (Hypothesized Relationship)	Employment Duration (Hypothesized Relationship)
<i>Dependent Variables</i>				
Employment Outcomes				
Average Hours Worked (48 Months)	Continuous	Average of monthly hours worked across 48 months.	N/A	N/A
Duration of Employment	Continuous	Days employed in each job.	N/A	N/A
<i>Explanatory Variables of Interest</i>				
Environmental Facilitators				
Accommodation	Indicator	1 if respondent had any job across 48 months with reported job accommodation.	Positive	N/A
# Accommodation	Continuous	Total Number of accommodations associated with a specific job (in Employment Panel Dataset Only).	N/A	Negative
<i>Covariates</i>				
Activities Limitations				
Phys Prob Affect Work	Indicator	1 if respondent reports physical health has cut back on time spent at work over the 5 interview periods.	Negative	Positive
Emot Prob Affect Work	Indicator	1 if respondent reports emotional health has cut back on time spent at work over 5 interview periods.	Negative	Positive
Went out Past Week	Indicator	1 if respondent reports going out to a restaurant or for coffee in past week over 5 interview periods.	Positive	Negative
Multiple Jobs	Indicator	1 if the respondents worked multiple jobs at any point during the study period.	N/A	Negative
How often Talk w/Fam	Ordinal	Frequency of familial contacts calculated as average of 1(Not at all)-5(At least once a day) scale over the 5 interview periods.	Positive	Negative
How Often See Family	Ordinal	Frequency of familial visits calculated as average of 1(Not at all)-5(At least once a day) scale over the 5 interview periods.	Positive	Negative
How Often Talk w/Non-family	Ordinal	Frequency of non-familial contacts calculated as average of 1(Not at all)-5(At	Positive	Negative

<i>Analytic Use</i>			Avg. Hours	Employment
Conceptual Framework Factor			(Hypothesized	Duration
Variable	Type	Definition	Relationship)	(Hypothesized
				Relationship)
How Often See Non-Family	Ordinal	least once a day) scale over the 5 interview periods. Frequency of non-familial visits calculated as average of 1(Not at all)-5(At least once a day) scale over the 5 interview periods.	Positive	Negative
Environmental Barriers				
Amount SSI	Continuous	Amount received in SSI in the previous month (current dollars) over the 5 interview periods.	Negative	Positive
Amount SSDI	Continuous	Amount received in SSDI in the previous month (current dollars) over the 5 interview periods	Negative	Positive
Unemployment Rate	Continuous	Monthly local prevailing unemployment rate at baseline.	Negative	Positive
Environmental Facilitators				
Rec'd Supported Employment Service	Indicator	1 if the respondents has been randomly assigned to received supported employment services.	Negative	Negative
Feelings about Family Relationships	Indicator	1 if the respondent is in supportive relationship with family over the 5 interview periods.	Positive	Negative
Feelings on Social Relation	Indicator	1 if the respondent is in supportive relationship with non-family over the 5 interview periods.	Positive	Negative
Health Status/Conditions				
Schizophrenia	Indicator	1 if respondent has a schizophrenia spectrum disorder at baseline.	Negative	Positive
Overall Health	Indicator	1 if respondent reported good to excellent overall physical health over the 5 interview periods.	Positive	Negative
Blunted Affect	Ordinal	Diminished emotional responsiveness calculated as average of 1(absent)-7(extreme) scale over the 5 interview periods.	Negative	Positive

<i>Analytic Use</i>			Avg. Hours	Employment
Conceptual Framework Factor			(Hypothesized	Duration
Variable	Type	Definition	Relationship)	(Hypothesized
				Relationship)
Social Withdrawal	Ordinal	Diminished interest in social interactions calculated as average of 1(absent)-7(extreme) scale over the 5 interview periods.	Negative	Positive
Social Avoidance	Ordinal	Diminished social involvement in social interactions calculated as average of 1(absent)-7(extreme) scale over 5 interview periods.	Negative	Positive
Personal Factors- Demographic				
Age at 2000	Continuous	Respondent age on January 1, 2000.	Positive	Negative
Age at 2000-Squared	Continuous	Respondent age on January 1, 2000 ² .	Negative	Positive
Female	Indicator	Female at baseline interview.	Negative	Positive
White	Indicator	Caucasian at baseline interview.	Positive	Negative
Married	Indicator	Married at baseline interview.	Positive	Positive
Independently Housed	Indicator	1 if the respondent is living in the community independently or with family at baseline interview.	Positive	Negative
Kids < 18	Indicator	Has children under age 18 living at home over the 5 interview periods.	Negative	Positive
Education	Ordinal	Education completed as of baseline interview from 1(some elementary) to 10 (doctoral).	Positive	Negative
Personal Factors- Economic				
# Months Employed 5yr	Continuous	Total number of months with paying job in the previous 5 years prior to the baseline interview.	Positive	Negative
Work Motivation	Indicator	1 if the respondent believes more dignity and self-respect comes with working.	Positive	Negative
Economic Burden	Indicator	1 if the respondent answered did not have enough money to cover food, clothing & shelter over the 5 interview periods.	Positive	Negative

*These variables were estimated in the selection equation for model identification
