

Online Supplement Table 1. Client demographic and diagnostic information at baseline (N=90)

	<i>N</i>	%
Age in years (M±SD)	40.88 (10.36)	
Gender		
Male	28	31
Female	62	69
Primary language		
Tamil	32	36
Dari	19	21
Pashtu	5	6
Somali	6	7
English	10	11
Other	18	20
Primary diagnosis		
Mood disorders	47	52
Schizophrenia or other psychotic disorders	42	47
Personality disorders	1	1

Online Supplement Table 2. Baseline and 2-year post-admission clinical data of clients who had stayed in the program for 2 or more years (N = 58)

	Baseline		2-year Follow-Up		<i>t</i>	Effect Size
	<i>M</i>	<i>SD</i>	<i>M</i>	<i>SD</i>		
Hospital days ^a	0.09	0.46	0.07	0.28	-0.27	-0.05
Hospital visits ^b	2.14	3.86	0.02	0.05	-3.60***	-0.77
Treatment adherence ^c	0.93	0.13	0.98	0.06	2.46*	0.49
Employment status ^d	1.28	0.49	1.69	0.90	3.07**	0.57

* $p < .05$; ** $p < .01$; *** $p < .001$ (2 tailed)

^aBaseline value is average number of hospital days from the first 6 months (month 1–month 6) in the Program and the 2-year follow-up value is the average value from the last 6 months (month 19–month 24) in the 2-year service period.

^bBaseline value is the average number of psychiatric visits in the year prior to admission to the Program (based on the client’s hospital admission or discharge reports as well as the referral forms) and the 2-year follow-up value is the average number of psychiatric visits of the last 6 months in the 2-year service period.

^cCoded as “0=not adherent”, “1 = adherent”. Baseline value is average value from the first 6 months (month 1–month 6) in the Program and the 2-year follow-up value is the average value from the last 6 months (month 19–month 24) in the 2-year service period.

^dCoded as “1 = no employment or other related activity of any kind”, “2 = no employment but other related activity (e.g. employment training)”, and “3 = employment all types”. Baseline value is the average value of client’s employment status in the year prior to admission to the program (based on the

client's hospital admission or discharge reports as well as the referral forms) and the 2-year follow-up value is the average value of the last 6 months in the 2-year service period.
