**Supplement Table 1: List of Quality Measures**

<b>Type of Indicator</b>	<b>Indicator</b>	<b>Eligible Population</b>
Prevention quality (1)	BP Screening	Adults >=18
	Cholesterol Screening	All adults
	Colorectal Cancer Screening	Adults 50-75
	Diabetes screening	Adults with BP>135/80
	HIV Screening	Adults >=18
	Obesity screening	Adults >18
	Tobacco use and counselling	Adults >=18
	STI Counseling	Adults >=18
	Mammogram	Females >=40
	Pap smear	Females >=21
Diabetes quality (2)	Chlamydia	Females <24
	Diabetes diagnosis in chart or problem list	Adults with FBS>126 or postprandial BS >200
	Eye and visual exam; cholesterol and HDL cholesterol tests; urine protein; foot examination; blood pressure; hemoglobin A1C	Adults with a diagnosis of diabetes
	Dietary and exercise counseling	Adults with a diagnosis of diabetes
	Oral hypoglycemic or insulin therapy	Adults with a diagnosis of diabetes
	ACE inhibitor or a calcium channel blocker	Adults with a diagnosis of diabetes and hypertension
	Follow up visit for diabetes	Adults with a diagnosis of diabetes
Hypertension quality(2)	Diagnosis of hypertension documented in the chart or problem list	Adults with blood pressures of >140 systolic and/or >90 diastolic
	At least 3 BP measurements on different days with a mean SBP>140 and/or a mean DBP>90.	Adults with a new diagnosis of stage 1-3 hypertension
	Assessment for risk factors (e.g. medications) that may cause hypertension.	Adults with a diagnosis of stage 1-3 hypertension
	Urinalysis; glucose; serum creatinine; serum triglycerides	Adults with a diagnosis of stage 1-3 hypertension
	Counseling for at least 1 of the following interventions	Adults with a diagnosis of stage 1-3 hypertension

	<ul style="list-style-type: none"> <li>a. Weight reduction if obese</li> <li>b. Increased physical activity if sedentary</li> <li>c. Low sodium diet</li> </ul>	
	Pharmacotherapy: ACE inhibitor, a calcium channel blocker, or a thiazide diuretic.	Adults with a diagnosis of stage 1-3 hypertension
	At least one annual visit for hypertension	Adults with a diagnosis of stage 1-3 hypertension
	Change in dose or regimen of anti-hypertensives or Repeated education regarding lifestyle modifications	Adults with hypertension with consistent average SBP>160 or DBP>90
Hyperlipidemia Quality(2)	Documented cholesterol level.	Men <age 70 with preexisting heart disease
	Documented LDL cholesterol	Men < age 70 with preexisting heart disease
	Documented measurements of cholesterol (total or LDL)	Adults on pharmacological treatment for hyperlipidemia
	Pharmacological therapy for hyperlipidemia	Men < age 70 with preexisting coronary disease who have an LDL cholesterol level >130mg/dl

**Supplement Table 2: App Usage Categories**

Category	Average Times Per Week Mean (STD, Min, Max)	<1 time per week %	1-2 times per week %	3-4 times per week %	5+ times per week %
ADD	0.13 (0.39, 0.00, 4.16)	96.8	2.6	0.6	-
DELETE	0.01 (0.03, 0.00, 0.20)	100.0	-	-	-
EDIT	0.12 (0.20, 0.00, 2.00)	96.2	3.8	-	-
VIEW	1.58 (1.53, 0.00, 5.60)	32.1	54.5	9.0	4.5

**Supplement Table 3: Moderator Analyses**

<b>Moderator Variable</b>	<b>F</b>	<b>Numerator df</b>	<b>Denominator df</b>	<b>P value for moderator*group*time parameter</b>
Clinic Site	0.30	3	614	0.83
>2 CVD conditions	0.05	3	614	0.99
Baseline smartphone ownership	0.63	3	614	0.60
